Easy Identification

It adopts the new function of automatic opening and closing by pressing, which is easy and convenient.

Movable guide rail plate can be put out of the box for wiring, unlimited by the space within the box. The panel can be adjusted to a level position with an ellipse hole in the guide rail plate, which betters its appearance.

Innovated function of adjustment enables the distribution box to adjust the height freely within a range from installation depth to the outside wall, which can be 20mm deep at the most. The newly added guide rail balance bar can keep the solid plate in a vertical installation.

The unique printed display of circuit breaker control makes the wiring structure clear, as well as easy connection, search and maintenance.
